

# Introduction

---

- Welcome to a brief discussion on *Directions in Networking*.
  - The initial question posed by the Technology Directors of the assembled school districts was- “What is the future of NetWare?” I have opted to change this question from one focusing on NetWare to one that looks at the benefits of Integrated Networks.
- To navigate this presentation you can select the right-arrow on your keyboard to go forward and the left-arrow to go backward.

# *Directions in Enterprise Networking*

---

- A Fully Integrated Environment
- With a Fully Integrated Environment you will not be Vendor-Dependent for your OS Platform

# *Directions in Enterprise Networking*

---

- A Fully Integrated Environment
- With a Fully Integrated Environment you will not be Vendor-Dependent for your OS Platform
- Take time to ensure you have a *well-designed tree or trees*

# Directions in Enterprise Networking

---

- A Fully Integrated Environment
- With a Fully Integrated Environment you will not be Vendor-Dependent for your OS Platform
- Take time to ensure you have a *well-designed tree or trees*
- In order to take ownership of this type of environment and not be Vendor-Dependent you must be *trained on all installed platforms*.  
*Training is the key to ownership in an Integrated Environment.*

# *Directions in Enterprise Networking*

---

- The three keys to a well-designed tree are:
  - Make it Easy to Use
  - Make it Easy to Administer
  - Make it Secure

# *Directions in Enterprise Networking*

---

- A Fully Integrated Environment-Example
  - Novell NetWare eDirectory Tree for File and Print and possibly IDM
  - Windows 2003 with eDirectory for Application Deployment
  - Linux, SLES 9 or 10, with eDirectory, for NAT, DHCP, DNS, Firewall, and over time File and Print
  - Install ZEN 7 and or GW 6.5/7 on Windows 2003
