

Automatic Client Upgrade (ACU) Sample Login Script Code

```
REM ***** This upgrades the Windows 95/98 Client *****
IF OS = "WIN98" THEN
    WRITE "Updating Novell Client for Windows 95/98"
    #\\FS1\sys\public\98client\ibm_enu\acu.exe
    IF "%ERROR_LEVEL" = "1" THEN
        EXIT
    END
END
REM ***** This upgrades the Windows NT/2000/XP Client*****
IF OS = "WINNT" THEN
    WRITE "Updating Novell Client for Windows XP"
    #\\FS1\sys\public\XPclient\winnt\i386\acu.exe
    IF "%ERROR_LEVEL" = "1" THEN
        EXIT
    END
END
```

- ***NOTE 1: For Windows NT/2000/XP, you must add the local user account to the Administrators Local group before the ACU runs.***
- ***NOTE 2: For Windows 95/98, copy the CAB files to the directory or subdirectory containing the client software that matches the operating system that requires the CAB files.***
